

## CHROMOCOLOR & CHROMOCOLOR-70

Natural Milled chromite-based  
( $\text{FeCr}_2\text{O}_4$ )

Raw materials for Glass Industry

KIMPE proudly offers its CHROMOCOLOR range, designed for the glass industry to achieve the iconic green coloration. Available as a fine powder (CHROMOCOLOR) or as a liquid suspension (CHROMOCOLOR-70), our products deliver consistent and reliable results.

## Applications

- ✓ *Green coloration of container glass (bottles, jars, food and beverage packaging)*
- ✓ *Decorative and functional glassware*

**POWDER FORM**

**SLURRY FORM**

**TECHNICAL SUPPORT**

Finely milled chromite for flexible use in glass formulations. Easy to store and delivers reliable performance in coloring.

Liquid suspension (70% solids) ready for direct dosing. Dust-free, easy to handle, and ideal for automated production.

Our experts provide tailored assistance, in-plant trials, and full analytical documentation (TDS, SDS, chemical and granulometric analysis).
