

# GRADE GF

Barium Carbonate – BaCO<sub>3</sub>

Raw materials for Glass Industry

KIMPE offers GRADE GF, barium carbonate in granular form that enhances brilliance and transparency in glass with optimal flowability.

Ideal for perfume bottles and premium tableware, it delivers consistent quality and reliable performance.

## Applications

- ✓ Brilliance and transparency in perfume bottles
- ✓ Fluxing agent to reduce melting point
- ✓ Technical glass formulations requiring refined optical properties

### POWDER FORM

Finely milled barium carbonate in powder form, easy to handle and integrate into glass batches. Delivers consistent optical improvements.

### TECHNICAL SUPPORT

Our experts provide tailored assistance, in-plant trials, and full analytical documentation (TDS, SDS, chemical and granulometric analysis).
